

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

LISTING OF CLAIMS

1. (Currently Amended) A door ~~open/close~~ open or close operating device comprising:

an operating switch;

a control device which detects an operation of the operating switch;

an actuator which is driven by the control device,

an output member which is driven by the actuator and transmits a drive force from the actuator to a door ~~open/close~~ member, and

an auxiliary power source which subsidiarily supplies a power to the control device and the actuator, wherein the operating switch, the control device, the actuator, the output member and the auxiliary power source are integrally formed.

2. A door ~~open/close~~ open or close operating device according to claim 1, wherein ~~a housing portion is formed at a base which supports the operating switch~~ forms a housing portion.

3. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 2, wherein a housing space for electrical components including the control device and the auxiliary power source and a housing space for machine

components comprising ~~such as~~ the actuator are separately provided in the housing portion.

4. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 3, wherein a separating member is provided for separating the control device from the auxiliary power source in the housing space for the electric components.

5. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 3, wherein the output member is integrally formed at the housing portion.

6. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 4, wherein the output member is integrally formed at the housing portion.

7. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 2, wherein a connector is formed integrally with the housing portion for connecting a harness located at a vehicle side.

8. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 3, wherein a connector is formed integrally with the housing portion for connecting a harness located at a vehicle side.

9. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 4, wherein a connector is formed integrally with the housing portion for connecting a harness located at a vehicle side.

10. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 5, wherein a connector is formed integrally with the housing portion for connecting a harness located at a vehicle side.

11. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 2, wherein the operating switch includes a plurality of a noncontact ~~switch~~ switches, and each a plurality of detecting ~~portion for~~ portions each detecting operation of a respective one of the operating ~~switch is~~ switches, each detecting portion being assembled to a board of the control device fixed inside the ~~housing~~ housing portion and facing ~~to~~ the respective operating switch across the base.

12. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 3, wherein the operating switch includes a plurality of a noncontact ~~switch~~ switches, and each a plurality of detecting ~~portion for~~ portions detecting operation of a respective one of the operating ~~switches~~, ~~switch is~~ each detecting portion being assembled to a board of the control device fixed inside the ~~housing~~ housing portion and facing ~~to~~ the respective operating switch across the base.

13. (Currently Amended) A door ~~open/close~~ open or close operating device

according to claim 4, wherein the operating switch includes a plurality of a noncontact ~~switch~~ switches, and each ~~a plurality of~~ detecting portion for portions detecting operation of ~~a respective one of~~ the operating switches, ~~switch is each~~ detecting portion being assembled to a board of the control device fixed inside the ~~housing~~ housing portion and facing ~~to~~ the respective operating switch across the base.

14. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 5, wherein the operating switch includes a plurality of a noncontact ~~switch~~ switches, and each ~~a plurality of~~ detecting portion for portions detecting operation of ~~a respective one of~~ the operating switches, ~~switch is each~~ detecting portion being assembled to a board of the control device fixed inside the ~~housing~~ housing portion and facing ~~to~~ the respective operating switch across the base.

15. (Currently Amended) A door ~~open/close~~ open or close operating device according to claim 6, wherein the operating switch includes a plurality of a noncontact ~~switch~~ switches, and each ~~a plurality of~~ detecting portion for portions detecting operation of ~~a respective one of~~ the operating switches, ~~switch is each~~ detecting portion being assembled to a board of the control device fixed inside the ~~housing~~ housing portion and facing ~~to~~ the respective operating switch across the base.
